

Playdoh recipe

Compiled by: Katie

If you want your kids to be able to bake whatever they make and then paint it afterwards, an even easier recipe than the other one submitted is: 2 cups of plain flour 1 cup of salt 1 cup of water Mix together, create masterpiece and then bake for 30mins on a low heat ie 120 degrees Celcius. Let cool and then paint. Perhaps even insert a paperclip into the back of masterpiece before you cook it so that you can hang it up. The general rule is to bake for 30 mins per cm thick the dough is. GOODLUCK!
