

Stone Dough

Compiled by: L.P.

Here it is: Stone Dough
1/2 cup of salt
1 cup of flour
1/2 cup of brewed coffee (cold)
1 cup of used coffee grounds
Mix ingredients together in a bowl. Turn out onto wax paper and knead until smooth. If dough is too sticky, fold in a little more flour. A drier dough works best. I keep dough in the refrigerator until ready to use. To keep the objects you impress from sticking, dip them in flour before pressing into the dough. Let "fossils" air dry for several days. I turned mine so they could dry faster. The dough and fossils smell great! And they look so realistic. Enjoy!
